

Tade Million

Full Stack Software Developer and API Integration

tedamillinyou@gmail.com | 0939847277 | Addis Ababa, Ethiopia | tade-dev.com | Mylinkden | Mygithub

PROFESSIONAL PROFILE

Strategic **Full-Stack Software Developer and API Integration Specialist** with over **2 years of intensive experience** in designing, developing, deploying, and maintaining mission-critical enterprise applications, high-concurrency web systems, and complex API ecosystems. Experienced in **financial technology and enterprise integration**, working on secure communication and seamless data exchange between financial institutions, banking platforms, and external organizations. Proven ability to integrate diverse systems and third-party services through **REST APIs, secure integration architectures, and enterprise middleware**, enabling reliable and scalable financial communication. Specialized in the **full Software Development Life Cycle (SDLC)**, from requirements analysis and system architecture to development, integration, testing, deployment, and production support. Experienced in transforming manual banking and business processes into scalable digital solutions while modernizing legacy enterprise systems. Strong focus on **secure API development, system integration, financial services, modern architectures, and reliable production deployments**, with a results-driven approach to delivering solutions that improve operational efficiency, interoperability, and business outcomes.

WORK EXPERIENCE

Amhara Bank, Full Stack Application Developer

02/2024 – Present | Addis Ababa, Ethiopia

- **Amhara Bank SC | Junior Software Developer and API Integrations** 02/2024 – Present | Addis Ababa, Ethiopia
- **B2B Financial Gateways:** Architected and deployed secure integration pipelines using **WSO2 API Manager, WSO2 Micro Integrator (MI)** for:
- **ESL Logistics:** REST APIs for customs invoice lookup, automated validation, and payment confirmation.
- **Ethiopian Airlines:** Ticket payment authorizations and automated corporate account settlements.
- **National Bank of Ethiopia (NBE):** Regulatory compliance data streams.
- **SantimPay Switch:** Bidirectional student bill inquiry and automated school tuition fee settlement.
- **Problem Management:** Executed continuous application monitoring, architecture reviews, production incident handling, and detailed **Root Cause Analysis (RCA)**.
- **DevOps & Containerization:** Packaged and maintained microservices using **Docker** and **Portainer** across **Linux OS** and **Windows Server (IIS)** with strict mTLS security.

Amhara Bank SC | IT Trainee — Software & ERP Developer

2023 – 02/2024 | Addis Ababa, Ethiopia

- **Enterprise ERP Development:** Built and enhanced core internal bank ERP platforms, including the **Automated Stock Management System** and **HRMS Personnel Platform**, to automate paper-based workflows.
- **Full-Stack & Backend Programming:** Mastered **C#** and object-oriented software engineering principles, developing scalable RESTful services using **.NET Core Web API** and modern frontends in **Next.js**.
- **Enterprise UI & DevExpress:** Crafted responsive, component-driven interfaces using **ASP.NET** & **WebForms with DevExpress AJAX-enabled controls** for fast, asynchronous user experiences.
- **Database & Stored Procedure Engineering:** Authored optimized **Microsoft SQL Server** stored procedures, complex table joins, and transactional queries; designed automated MIS reports using **Crystal Reports**.
- **Security & Lifecycle Deployment:** Implemented Role-Based Access Control (RBAC), session state management, and managed application hosting on **IIS** with HTTPS and Git version control.

KEY ENTERPRISE PROJECTS

- **Fiscal Budget & Planning Platform:** Built bank-wide planning system using **.NET Core Web API, Next.js (App Router)**, and **SQL Server**; deployed on **IIS** with automated approval workflows.
- **Enterprise HRMS :** Maintained mission-critical HR system using **ASP.NET** & **WebForms, DevExpress AJAX components, Crystal Reports**, and optimized SQL stored procedures.
- **Automated Stock Management:** Engineered multi-warehouse inventory solution leveraging **DevExpress AJAX controls**, FIFO tracking, and real-time ledger updates on **SQL Server**.
- **Judicial Court CMS (Amhara Supreme Court):** Developed case tracking and cashier reconciliation platform with executive analytics dashboards.

TECHNICAL SKILLS

- **Integrations & Middleware:** WSO2 API Manager, WSO2 Micro Integrator (MI), XML Synapse Mediation, RESTful APIs, SOAP, mTLS, JWT, EthSwitch.
- **Backend & Full-Stack:** C#, .NET Core Web API, ASP.NET & WebForms, Next.js 16, React 19, TypeScript, Node.js, Express.
- **UI & Enterprise Components:** DevExpress (AJAX Controls), Tailwind CSS, Material UI, CSS3/SCSS.
- **Databases:** Microsoft SQL Server (Stored Procedures, Query Optimization, ACID Compliance), Crystal Reports, MongoDB, MySQL.
- **DevOps & Operations:** Linux OS (Bash), Docker, Portainer, IIS, Nginx, Git, Telemetry Monitoring, Root Cause Analysis (RCA).

EDUCATION

BSc in Computer Science — Mekdela Amba University, Ethiopia (Graduated July 2023)

EDUCATION

Bachelor Degree from Department of Computer Science, Mekdela Amba University

Ethiopia

- CGPA: 3.95 / 4.0

SKILLS

Development • ERP Systems and other Web App Development • Rest and SOAP API Development and integrations • Agile Methodologies	Languages JavaScript, PHP, and C#,Java	Frameworks & Libraries React.js, Next.js, Node.js, .Net Core, .Net frameworks	Databases MSQL, MYSQL, MongoDB
DevOps & Tools • Git and GitHub • Docker & portainer • IIS & window server
