

Tade Million

Full Stack Software Developer and API Integration Officer

tedamillinyou@gmail.com | 0939847277 | Addis Ababa, Ethiopia | tade-dev.com | Mylinkden | Mygithub

PROFESSIONAL PROFILE

I'm a Full-Stack Software Developer with over 2 years of intensive experience designing, developing, deploying, and maintaining mission-critical enterprise applications and high-concurrency web systems. My work has focused on building reliable systems that can handle real business demands while keeping performance and stability in mind.

Alongside full-stack development, I have strong experience in API Integration. I've worked on complex API ecosystems and enterprise middleware, enabling secure communication and seamless data exchange between financial institutions, banking platforms, and external organizations. I specialize in building REST APIs and secure integration architectures that support reliable and scalable financial communication.

I have hands-on experience across the full Software Development Life Cycle — from requirements analysis and system architecture to development, testing, deployment, and production support. I've also helped transform manual banking and business processes into scalable digital solutions while modernizing legacy systems. My approach is practical and results-driven, with a focus on improving operational efficiency, interoperability, and long-term maintainability.

WORK EXPERIENCE

Amhara Bank, Full Stack Application Developer and API Integration Officer

02/2024 – Present | Addis Ababa, Ethiopia

- Designed and deployed secure financial integration pipelines to connect the bank with external partners and third-party systems.
- Built and maintained REST APIs for logistics partners, enabling customs invoice lookup, automated validation, and payment confirmation.
- Developed payment authorization and automated corporate account settlement integrations for major airline partners.
- Implemented regulatory compliance data streams for the National Bank of Ethiopia (NBE).
- Created bidirectional student bill inquiry and automated tuition fee settlement APIs for payment switch partners.
- Performed continuous application monitoring, architecture reviews, production incident handling, and detailed Root Cause Analysis (RCA).
- Packaged and maintained microservices using Docker across Linux and Windows Server environments, applying strict mTLS security.

Amhara Bank S.C. IT Trainee – Software & ERP Developer 2023 – February 2024 | Addis Ababa, Ethiopia

- Developed and enhanced core internal bank ERP platforms, including Automated Stock Management and HRMS systems, to digitize paper-based workflows.
- Built scalable RESTful services and modern frontends using .NET Core Web API and Next.js.
- Created responsive, component-driven interfaces with ASP.NET *WebForms* and enterprise UI components for fast asynchronous user experiences.
- Wrote optimized SQL Server stored procedures, complex joins, and transactional queries; designed automated MIS reports.
- Implemented Role-Based Access Control (RBAC), session management, and managed application hosting with HTTPS and Git version control.

Key Enterprise Projects

- **Enterprise HRMS** – Maintained a mission-critical HR system with AJAX-enabled components, reporting tools, and optimized stored procedures.
- **Automated Stock Management System** – Built a multi-warehouse inventory solution featuring FIFO tracking and real-time ledger updates.
- **Judicial Court CMS (Amhara Supreme Court)** – Developed a case tracking and cashier reconciliation platform with executive analytics dashboards.

Technical Skills

- **Integrations & Middleware:** API Management, Micro Integrator, RESTful APIs, SOAP, mTLS, JWT, XML Mediation
- **Backend & Full-Stack:** ,Java, Spring Boot, Python, C#, .NET Core Web API, ASP.NET *WebForms*, Next.js, React, TypeScript, Node.js, Express
- **UI & Enterprise Components:** DevExpress, Tailwind CSS, Material UI, CSS3/SCSS
- **Databases:** Microsoft SQL Server (Stored Procedures, Query Optimization), Crystal Reports, MongoDB, MySQL
- **DevOps & Operations:** Docker, Portainer, Linux (Bash), IIS, Nginx, Git, Application Monitoring

Education

BSc in Computer Science — Mekdela Amba University, Ethiopia (Graduated July 2023)

EDUCATION

Bachelor Degree from Department of Computer Science, Mekdela Amba University

Ethiopia

- CGPA: 3.95 / 4.0

SKILLS

Development • ERP Systems and other Web App Development • Rest and SOAP API Development and integrations • Agile Methodologies	Languages JavaScript, PHP, and C#,Java,Spring Boot,Phyton	Frameworks & Libraries React.js, Next.js, Node.js, .Net Core, .Net frameworks	Databases MSQL, MYSQL, MongoDB
DevOps & Tools • Git and GitHub • Docker & portainer • IIS & window server • Jenkins • Kubernetes
